

## Optimized Technology

SRS can help define an infrastructure approach that ensures all of your IT needs are consistently (and safely) well-managed so that you can focus on doing what you do best.

## IT-Business Planning | System Installation

As an IT Services firm, SRS views our best-fit role as an expert technical advisor, trusted IT partner and ally. SRS leadership often participate as part of a client team in the development of short/long term strategic plans developing comprehensive budgets that emphasize the cost-effective use of technology. A number of SRS clients have been customers for well over a decade.

Strategic Response Systems specializes not only in complex systems, but has experience migrating from many older technologies. Engineers skilled in legacy technologies are a scarcity which is why SRS continues to keep up its skill set in a range of legacy systems.

## Expansions | Relocations

One of the advantages of cloud is it gives you not only agility in business processes, but you are also more free to move your physical offices. Still, office relocations and branch openings require a high degree of logistical planning. Equipment ordering, installation, and launch of IT operations often requires outside assistance and expertise.

SRS can provide customized services to support internal VoIP and other IT projects of this nature and also work remotely to deliver turnkey systems and install packaged solutions. SRS has also observed an increased adoption in video conference-enabling technologies, an area in which SRS has broad experience.

## Project Expertise

### IT-Business Planning

SRS is your strategic partner in the development of IT plans that map projects to tangible business gains.

### System Installation

“System Installation” refers to SRS’ capability to install workstation, server, network, and software-based systems.

### Expansions

SRS can manage the planning, equipment/software purchase and installation across additional rooms or floors.

### Relocations

Growth or relocations requiring transportation, or branch office IT infrastructure development is an SRS strength.
